POLLET WATER GROUP

Water is life. Water is growth. Over four decades, Pollet Water Group has been thinking water. It's our mission to improve the quality of life, the comfort of doing business and the efficiency of industrial processes through a network of specialized water treatment companies. Our solutions protect your home and business against costly replacements due to the damaging effects of water. Our technologies make it possible to turn seawater into drinking water. Our know-how even contributes to achieving the best possible quality of life for dialysis patients. With headquarters in Waregem (Belgium), Pollet Water Group supplies both components and complete solutions throughout Europe, Africa and the Middle East. Together with our partners and customers, we are committed to make water count.

Our offer

Water treatment components & systems

- Domestic, commercial, horeca, industrial and medical solutions
- Know-how on tap water, well water, sea water, drinking water, cooling water, brackish water, river water, ...
- Techniques in water treatment such as softening, filtration, oxidation, reverse osmosis, sea water desalination, water reuse, disinfection, process water treatment, ...

Join us on our mission.

Make water count.

BUSINESS UNITS OF POLLET GROUP

Pollet Water Group is part of Pollet Group who owns more than 40 companies in 12 countries all over the world. Pollet Group is active in 3 main business units: water, pool & supermarkets.

Water

A network of specialized water treatment companies.

- + € 185.000.000
- + 800 employees
- + 25 companies
- B-to-B

Pool

YOUR DAY-TO-DAY LIFE

Before your tap water reaches your home, a water company will have already subjected it to various treatments. However, the calcium in your water often builds up scale in pipes, shower heads, steamers, washing machines, dishwashers. The domestic solutions provided by the Pollet Water Group improve your day-to-day life and ease your comfort. Our products enable the end user to reduce water consumption, save detergents and soap, save energy, ensure a maximum return (on investment) and finally they provide a better quality of life.

Pollet Water Group offers IOT-solutions to keep your home water softener connected. Our cloud based platform offers you a high-end solution to consult & modify your water softeners from a distance and grant your end-user a full service solution for a carefree softener. We are developing future proof products to engage with new LPWAN-technologies like LoRa and Sigfox. In that way we can optimize the monitoring of your device, both for the installer and for the end user.

YOUR HOSPITALITY

Pollet Water Group offers total solutions for your horeca business. We study each process that involves water in your establishment and offer a solution to create a unique water for every need. Our solutions optimise your resources and reduce damage. Thanks to adapted installations you save up to 75% on chemicals. On top of that your crystal and glasses also look better and show no traces of scale.

Better water not only influences your devices, but also the taste of your coffee, your tea, your ice. Did you know that more and more HORECA-businesses are shifting from the traditional water bottles, to drinking water they can produce themselves? Point of use drinking water units eliminate the need to purchase bottled water for your restaurant or bar. It allows you to use personalized bottles and improve your branding. Furthermore, these solutions save you a lot of money. Our water filtration systems are available with carbonation, chilling and warming options.

Join us on our mission.
Make water count.

OUR ADDED VALUE

- The taste of perfect tailor-made water
- Unique, personalized bottles with your branding
- Optimization of resources and reduced damage
- Up to 75% savings on chemicals
- Study of your water processes
- Total protection of your installations
- Reduction of polluting discharges by up to 50%
- Professional technical service, 365 days per year
- Quality audits
- Installation and maintenance protocols
- Tailor-made financial solutions

YOUR BUILDING

Commercial buildings such as apartments, offices and smaller industrial companies are big water consumers. Your businesses and buildings rely on the availability of water. Next to the growing demand, your water resources should be protected, safe and of high quality. A business with clean, conditioned water is a business that saves time and money. Our building products prevent costly replacements due to the damaging effects of hard water. Our engineers develop solutions to treat your water sources with the best possible effect.

Next to that, Pollet Water Group improves your comfort by offering solutions such as intelligent and user-friendly water coolers. These solutions with patented green technology and proven energy savings will help you reduce the number of bottles you use.

YOUR INDUSTRIAL PROCESSES

Water is a precious and universal good. Without water, there would be no life, no agriculture, no industry. 90% of our worldwide demand for water comes from industry and agriculture. Our technologies allow you to optimize your water consumption and utilise alternative water sources to reduce operating and energy costs and improve your production process.

Pollet Water Group has acquired valuable experience in the UV industry. UV is a modern chemical-free technology that leaves no taint or residuals in the water. UV can also be used in markets such as the food industry for both 'air and surface' treatment leading to extended shelf life. UV can be used in both clean water applications and in effluent treatment. Other market sectors include: Agriculture, Aquaculture and Swimming Pools.

Thanks to our know-how and engineering skills, the Pollet Water Group experts advise, design and build the installations for your water facilities. That is how we take care of water so you can focus on your core business.

Join us on our mission.
Make water count.

OUR ADDED VALUE

YOUR HEALTH

Pollet Water Group is specialized in innovative solutions for the supply of high purity water to dialysis centres worldwide. Our expertise in water treatment covers all aspects ranging from the pre-treatment stages, through reverse osmosis, ultra-filtration and heat disinfection systems, right up to the supply connection hose into the dialysis machine. Our companies active in dialysis water treatment have been setting standards. We are the only group producing ultra-clean permeate using the combination of reverse osmosis and central ultrafiltration, including integral simultaneous heat disinfection of the main ring of the dialysis machine.

All our units have the necessary medical certification. Our technical and medical know-how contributes to achieving the best possible quality of life for dialysis patients worldwide.

Join us on our mission.
